

January 2016

Dear ISBI Colleagues and Exhibitors,

The International Society for Burn Injuries (ISBI) 2016 Congress is quickly approaching and hosted this year in Miami, Florida, USA, from 28 August-1 September 2016. I am proud to represent the entire world burn community, patients, and professionals with the mission of "*Guiding Burn Care in Low and Middle Income Countries,*" improving burn education and developing guidelines for burn care in low resource settings.

The ISBI is working to develop practice guidelines for all practitioners, across boundaries, who may be challenged at any time due to lack of resources. We are urging all professionals to join hands in this mission while we continue to develop research and innovative techniques to further burn care in the entire world.

To foster the path we are pursuing, the ISBI needs your support by registering to attend the 18th Congress, in Miami, Florida, booking an exhibit booth or symposia, and making a commitment to be an ISBI sponsor in 2016. So many opportunities are available, offering all levels of sponsorship to fit your company's budget needs, and Miami is an exciting destination to enjoy with friends, family, and colleagues.

ISBI today is a dedicated, and purposeful organization due to the dedication and efforts of many professionals. We urge you to come forward to support the ISBI.

ISBI registration opened on 19 January 2016, hotel room reservations have been available since August 2015, and many opportunities to secure a sponsorship, symposia, or exhibit booth are available waiting for your commitment. Check the ISBI website to learn more, www.isbi2016.com. I look forward to seeing all of you in Miami, USA from 28 August-1 September 2016 for the ISBI 18th Congress.

Rajeev B. Ahuja, MS, MCh, DNB, FACS, FICS, FAMS

ISBI President
